For Immediate Release

MOTOR GUARD EXPANDS LINE OF RIGID SANDING BLOCKS

Designed for High Performance Blocking on Steel or Aluminum Body Panels

Motor Guard has expanded their line of **Super-Rigid Big Block** models for fast and aggressive blocking of aluminum or steel. Engineered from super-dense yet light-weight materials, these new sanding blocks provide just the right amount of flex to conform to body panels and slight contours, both aluminum and steel. Super-flat faces result in fast and flawless finishes.

The **BGR-1** (1-1/2"x11") allows the user to create the ultimate blocking bar by wrapping an abrasive sheet around this narrow, rigid block. Just the right width for power blocking in small areas, this block flexes slightly to follow contours.

The **BGR6-1** (5-1/2") is an ultra-flat super rigid block for use with 2-3/4" PSA rolls or half-sheets with no waste. Finger recesses on the sides allow for a firm yet powerful grip while tackling the toughest jobs. Hook Faced model is **BGRK6-1**.

Big-Block Rigid Sanding Blocks

For aggressive, two-handed blocking, the extra-long **BGR12-1** (11") and **BGR16-1** (16") are unequaled. Use with 2-3/4" PSA rolls or full sheets with no waste. Power block large areas with ease. For Hook Faced models, order **BGRK11-1 / BGRK16-1**.

The Big-Block Rigid Sanding Blocks are the latest addition to a full line of repair and refinishing products. From Pulling to Painting, Motor Guard Corporation has a product for all of your autobody repair and refinishing needs.
